

HAKTRAK THREAT INTELLIGENCE FOR THE FINTECH

Objectives

A leading financial technology organization partnered with HakTrak to ramp up its security measures and fortify its systems against potential breaches. With their services utilized across a wide range of industries, including finance, this organization knows how critical it is to maintain the highest level of security for their client's sensitive information.

HakTrak came to the rescue by carrying out a full suite of pen testing services and in-depth vulnerability assessments to pinpoint areas of weakness. Their comprehensive threat monitoring ensured that even the most unknown attack vectors were identified and addressed before they could pose a threat. Rest assured, with HakTrak's assistance, this finance industry giant is well-equipped to keep threats at bay and remain a trusted partner for their extensive client base.

Client Challenge

A reputable global organization with its headquarters in Dubai requested the expertise of HakTrak's Red Team to conduct pen testing and ensure its online presence is secured. With a wealth of internet presence and a vast array of acquired products, the organization knows the importance of protecting its registered domains from potential threats. Given the heightened focus of cyberattacks on the financial and fintech sectors, the organization aims to comprehend its weaknesses and strengths against entirely possible threats.

The client desired to maintain their already successful cybersecurity efforts by enlisting the expertise of the HakTrak Red Team for threat intelligence services. Despite feeling confident in their current security measures, they recognized the importance of staying ahead of the ever-evolving threats in the cyber world. Equipped with the cutting-edge HakTrak Threat Intelligence Platform, the Red Team scoured the dark web for any indication of leaked sensitive information that may put the client's services and applications at risk. With proactive monitoring and analysis, the client was empowered to preemptively mitigate potential threats and ensure their assets' continued safety and security.

Threat Intelligence

The HakTrak Red Team has gone above and beyond its penetration testing services by providing its client with a comprehensive threat intelligence report. This report outlines the most common threats facing the client's organization and associated applications and services. Not only does it expose potential attacks and information leaks, but it also provides actionable recommendations for mitigating any problems found. By limiting online exposure to sensitive information, the client can ensure that their organization remains secure in the face of potential threats.
